

VISITOR BADGE PRINTER

BKS100

The BKS100 is an ultra compact and affordable thermal printer that prints labels easily and quickly. The printer is ideal for printing visitor badges to CavVisit visitor management system. The printer is easily opened with a button to be filled with 500-sheet label rolls. The process only takes a few seconds. A built-in LED light shows printer status (red, green, orange). Also available with color ribbons that print in color.

The visitor badge printer comes in standard version with perforated labels that are torn easily torn off by the printer's metal teeth. The printer can be equipped with a scissor that cuts the label after it's printed.
